## SKILLS

Ruby on Rails, React, Redux, Ruby, Python, Javascript, AWS, MySql, NoSql, MongoDB, Postgres, OOP, System Design, Swift, Jquery, AJAX, RESTful API's, HTML5/CSS, React Hooks, PHP

## PROJECTS

**FunReads |** (Rails, React, Redux, HTML5, JavaScript, AWS, PostgreSQL and CSS3)                    **Live Site |Github**

*A full-stack single-page pixel-perfect tribute to GoodReads where users can create and edit bookshelves, track books, and create, edit, or remove reviews.*

- Devised Object-Oriented associations through has many, has one, and has through associations to streamline common operations to be simpler and easier.
- Administered CSS hover selectors to render user-friendly interfaces to display book information in a concise manner.
- Incorporated promises and then clauses to control async actions to design a smoother data appearance.
- Applied AWS S3 to store images allowing the website to be less storage-intensive and readily scalable.

**Dungeon & Management |** (MongoDB, HTML, CSS, React, and JavaScript)                    **Live Site | Github**

*A full-stack single-page character-manager website where users can create, track and edit characters for the popular Dungeons and Dragons game.*

- Implemented a react-router dom-manipulation to reroute to individual character pages using withRouter through pulling the character id from URL.
- Integrated CSS and onClick event handlers to render an editable character page while actively editing and non-editable while not.
- Engineered a bug-free front-end auth using react to check and send relevant information to the backend.
- Dynamically use algebra to auto-populate fields to allow a smoother user interfacing.

**SFDates** (JavaScript, HTML, CSS, React Hooks)                    **Live Site | Github**

*A full-stack date suggestion website where users can find the perfect date in the Bay Area with zero effort.*

- Implemented React Hooks to keep code clean, modular, and reactive.
- Designed a search function that pools initial results and then filters through them.
- Worked with a project manager to create a clean and easy UI for users.

## EXPERIENCE

**Colliers International,** *Research Analyst*  San Francisco, Ca                    2018-2019

- Individually customized and migrated a Salesforce-based database containing over 70,000 informational points for a team earning over $100 Million in 2018.
- Generated $100,000 within the first 3 months through analyzing 94 properties owned by one of the largest Multifamily clients in San Francisco.
- Created and maintained multiple offering memorandums and buyer Opinion Of Value's for a team of 12 brokers which lead to the team earning over $100 Million.

**Aspen Skiing Company,** *Product Sales and Services*   Aspen, Co                    2016-2017

- Determined the client's needs to cross-sell products from the in-depth product tree.
- Communicate and collaborate with team, supervisors, and managers.
- Liaison the onboarding process between new employees, HR, and Product Sales and Services.

**Radius Commercial Real Estate,** *Paid Intern*  Santa Barbara, Ca                    2015

- Cold-calling to find potential buyers or sellers and investigating/researching potential properties to buy.
- Creating marketing flyers on current listings for potential investors.
- Design excel spreadsheets in competitive markets to determine the value of properties and streamlining the marketing process of existing listings.

## EDUCATION

**App Academy**   San Francisco, Ca                    2019

- Top immersive program - by SwitchUp - focused on web development. Teaching Ruby on Rails, JavaScript and React/Redux

**Oberlin College**   Oberlin, Ohio                    2012-2016

- Major in Economics with an education focus in Real Estate. Played college soccer all four years.
