

MACALLAN SAVETT

ENGINEERING MANAGER | CUSTOMER PLATFORMS | APPLIED AI

Seattle, WA | [805-451-0363](tel:805-451-0363) | jsavett@gmail.com | [LinkedIn](#) | macallan.space

PROFILE

Engineering manager and full-stack engineer with 5+ years building SaaS products, enterprise integrations, and secure customer experiences. Leads a distributed team of four across hiring, performance, capacity, technical direction, and delivery. Remains hands-on with Python, Django, JavaScript, TypeScript, Vue, React, AWS, authentication, and applied AI.

EXPERIENCE

Gainsight (Skilljar) | Seattle, WA, Remote | Jan 2021 - Present

Engineering Manager, Customer Platforms | Apr 2026 - Present

- Lead four engineers across hiring, performance reviews, capacity planning, technical direction, and delivery of customer-facing platforms and enterprise integrations.
- Built a capacity model covering a 41-item backlog and 20 concurrent sprint items to identify delivery risk, sequence commitments, and support regional headcount planning.
- Set code-review, testing, and release standards; coach engineers on system design, execution, and cross-functional communication while continuing to review and ship code.
- Own technical delivery across mSSO and OAuth, PII workflows, migrations, Django REST APIs, and AWS S3 and CloudFront; turn recurring customer needs into reusable platform patterns and product feedback.

Software Engineer II | Aug 2022 - Apr 2026

- Built reusable React and Django modules plus automated CI/CD workflows, improving feature release speed by 40% and contributing to a 30% reduction in production defects.
- Automated customer-specific JavaScript delivery through an S3 bundling pipeline; redesigned authentication flows for dynamic redirects, organization-specific identity providers, MFA, and compliance requirements.
- Reduced a key PostgreSQL query from 900 ms to 300 ms and improved large-catalog rendering through component-level loading and CloudFront delivery.
- Mentored five engineers on implementation and system design; one was promoted.

Software Engineer I | Jan 2021 - Aug 2022

- Built Vue and Django REST features for customer course catalogs and expanded PyTest and Cypress coverage from 25% to 65% across three product teams.
- Automated onboarding, offboarding, and PII workflows, cutting manual effort by roughly 50% per client; improved SSO integrations and reduced authentication support demand.

SELECTED APPLIED AI WORK

- **Personal Modular App Hub** (*Next.js, TypeScript, MongoDB, WebAuthn, OpenAI, Anthropic*): Built a PWA that unifies 15 tools behind shared authentication and AI infrastructure, with MFA, structured outputs, retries, and provider routing.
- **AI Review and Daily Voice Log** (*FastAPI, Django, React, AWS*): Built a five-agent code-review workflow and a voice-first reflection app with transcription, structured extraction, weekly summaries, and secure storage.

SKILLS

Leadership: Hiring, performance management, coaching, roadmaps, capacity planning, distributed teams, delivery management

Technical: Python, Django, FastAPI, JavaScript, TypeScript, React, Vue, Next.js, PostgreSQL, MongoDB, AWS, Docker, CI/CD, REST APIs, OAuth, mSSO, PyTest, Cypress

EDUCATION

App Academy, Software Engineering Certificate, 2020 | **Oberlin College**, B.A. Economics, 2016
